Sudden Rise Occurs at Midday, When Shorts Were Caught Unawares-May Option Closes at Net Gain of 3 Cents.

Chicago, April 5.-May wheat took a jump of nearly 4 cents a bushel on the Board of Trade to-day.

The advance took place in almost as short a time as it takes to tell about it. and was one of those freakish caprices of a manipulated market, such as that which now exists as the result of a determined effort on the part of a few Wall street speculators to shake a few dollars out of the pockets of the bears in the wheat pit. May wheat opened at \$1.14 to \$1.14\to and gave no sign of undue activity until along about midday, when a sudden cessation of offerings threw the amailer shorts into a panic.

offerings threw the amalier shorts allowed panic.

In the scramble to buy which followed the price of May was up 1 cent between transactions, until \$1.175, was reached.

When this point was reached, enough of the commodity was disposed to afford the more anxious bears opportunity to cover and get out of barm's way.

The price of the May option at the close was \$1.17, a net gain of 3c as compared with the close of the previous session on Monday.

ARGUMENTS CONTINUED ON PORT DIFFERENTIALS.

Washington, April 5 .- Why port differentials should exist and why they should not was argued further before the Interstate Commerce Commission to-day in the effort to have the commission suppress the present railroad and steamship differentials in favor of Baltimore, Chesapeake Bay points and Philadelphia, as against Boston and New York.

Boston and New York.

John B. Daish of Washington, one of the attorneys for Baltimore, concluded the argument he began yesterday, his point being that the differential, which on some freight from Chicago to Baltimore is 3 cents against Boston and New York, is needed because of the geographical location of the Monumental City.

Charles S. Hamlin, representing the Chamber of Commerce of Boston, argued that the differential was simply discriminating against Boston, and that the ocean differential of 5 cents was nothing move than a subsidy paid by Westerners to aid Baltimore, Philadelphia and other Southern cities. Boston merchants, Mr. Hamlin said, had figured out what the differential should be, if one were to be paid, and had found that Baltimore should not, on distance or any other claims, be allowed more than one twenty-fifth of a hundredth of a cent, instead of 5 cents.

DEFENSE WAS WILLING.

Mr. Shay, who appeared for the defendants, said he was willing that the case should go over, but in view of the fact that the cases were thus to go over for several days, in order that no hardship he worked on his elicuts, he asked that a bond be fixed.

He did not know that they would be able to give bond, but thought they should be allowed the privilege and hoped they night secure bail if it was not placed too high.

After some discussion the court fixed the bail at \$2.00 in each case. Mr. Shay expressed the hope that bell might be accured during the afternoon, but in the meanwhile the prisoners were remanded to the county ball.

understood J. P. Morgan & Co. have bought a majority of the securities and then the property to a great trunk line entering Chicago, presumably a Vanderbilt road deny the acquisition of the company, but said they could make no statement now.

This change in control is a sequel to efforts made since January, when interest on the coupon honds was unpaid, to reorganize the affairs of the company. Since that time the bond and stock holders arrayed themselves ugainst each other, and it is said news of a purchase of control by the Morgan interest took the reorganization committee completely by surprise.

The company owns 750 acycs, of which fifty acres are in the center of the business district, with nearly 27 miles of railroad. It has a capital stock of \$5000,000.
